.....

c) Play station/ be /invent/ by / the Japanese / invent / Ken Kutaragi.

.....

d) All children / Britain/ attend /school / the age of five / the age of 16

.....

## **TEXT**

1) The digital age is upon us, and who would have thought it would happen so fast? It seems like only a few years ago when owning a cell phone was a status symbol. Now the device has been marketed as a necessity that we all need to get through the day. In the early days of cell phones I remember that people used to treat **them** in the same manner that they treated credit cards, only for an emergency.

2) Cell phones used to be very large and were kept in people's automobiles. Nobody ever seemed to discuss wireless plans, or the capabilities of their phones. The only question people asked was, why did you bring your cordless phone to work? It wasn't until later models that folded for convenience that it caught on. Marketing is a powerful tool along with innovation. Marketing helps get the word out on the new products. I look at it as the worm on the fishing hook, a few people nibble but after much study they seem to always get us to bite.

3) We eventually do bite, but I am surprised at the quick innovation that seems to occur at a rapid pace every year. As soon as I received my new LG cell phone, it was soon replaced with a sleeker more attractive phone with more technological features. It seems almost too hard to keep up with.

4) The companies are trying harder and harder for our hard earned dollars. But it is not as if **they** are holding out as long as they can anymore. Now that the market is in a heated competition between such companies as Verizon, T-Mobile, Sprint/Nextel, At&T/Cingular. Many of the companies have combined resources to make forward progress.

5) Nowadays we can enjoy live updates for sports, news and other services. We can check movie times and prices for a new car or ask how our mothers are doing with just one amazing device.
